

Ms. Rupam Gautam is the Asset Management Head at CleanMax, the trusted sustainability partner for Asia's leading commercial and industrial customers. She heads the Northern and Eastern regions for CleanMax in India. With over 9 years of experience in the Renewable Energy and Power sector, Ms. Gautam has experience and expertise across various avenues in the value chain of business – right from sales, design to delivery. Her demonstrable excellence as a sales expert, combined with technical knowledge helps her scale up operations while maintaining quality and control. Prior to CleanMax, Ms. Gautam has worked with Larsen & Toubro for over 5 consecutive years across different capacities. She worked in the core engineering team which designed supercritical pressure boilers used in coal-fired power generation plants with operating capacities between 660 and 1,000 megawatts. Her key responsibilities included assortment of materials, vendor selection, instrumentation control, logic preparation and monitoring of many other parameters. Apart from this she was also part of the process that initiated the requirement of renewable energy sources like solar energy plants in the coal fired plants. She is a Certified level 2 - Value Engineer from SAVE, USA. She is also a yellow belt in Six Sigma with a strong hold in Asset Management, Business Development, Engineering, Project Management, Fund Raising, Due diligence activities with the likes of KPMG. She has also liaison with Central and State nodal agencies like SECI, MNRE, UPNEDA, HAREDA, to name a few. She is a visiting faculty at various renowned institutes / organisations like IMT Ghaziabad, GN group, Invertis University, ITS group, GCET amongst others. She has also been keynote

# RUPAM GAUTAM

HEAD-ASSET MANAGEMENT, NORTH & EAST INDIA, CLEANMAX

**“ WE ARE PROBABLY THE ONLY GENERATION WHO ARE AT THE CUSP; AND HAVE THE OPTION OF SAVING OUR RESOURCES, MAKE SURE WE ARE REMEMBERED THE RIGHT WAY.”**

speaker and panelist at numerous events for the power sector organised by firms like Honeywell, NTPC, etc; and has acted as senior in-house trainer on topics like DCS, Business Development, Personality Development and Project Management. Her strong engineering background and management degree from IMT Ghaziabad provides her a good stead to understand and influence every aspect of CleanMax's processes. She has worked in different capacities throughout the project cycle to service the clients' and investors' requirements for high generation and revenue.
