

Environment Policy

CleanMax's vision is to be the sustainability partner of choice for private users. We believe that good environmental performance is key to ensure sustainable business and thus considered as an integral part in our business decision making process. We are enabling our clients/business partners to reduce their carbon footprint through renewable energy. We are committed to identifying, evaluating, mitigating and where possible avoiding, the negative impact of our projects on the environment within which we operate, and ensuring that our work enhances the environment.

We encourage everyone towards sustaining and continuously improving standards of the Environment to attain and exceed benchmarked standards.

CleanMax's Environment Policy Aims -

- Implementing an environmental management system which is integrated into the lifecycle of our projects and offices globally.
- Assigning environmental accountabilities across the business.
- Complying with all the statutory obligations set out under local, regional, national and international laws, as applicable.
- Striving to not only meet, but exceed, the recognised international industry standards such as those set out by the World Bank Group/International Finance Corporation.
- Ensuring that environmental impact is considered in the procurement of all our products and services, the management of all our assets, and in all of our investment decisions.
- Communicating & ensuring that all our stakeholders understand and demonstrate that they conform to our policies and meet the standards we expect of them.
- Resolutely investigating environmental incidents and communicating any lessons learned across CleanMax.
- Undertaking regular audits and reviews to ensure that our environmental management system is effective and that our projects are implementing all relevant requirements.
- Providing senior management with periodic assessments of the performance and effectiveness of our environmental management performance.
- Establishing a formal grievance management procedure for receiving, investigating and responding to concerns raised by internal and external stakeholders relating to environmental issues.
- Ensuring employees feel comfortable reporting their environmental concerns.
- Taking pollution prevention into account throughout the lifecycle of each project.
- To develop and maintain activities which protect and enhance the environment.
