CleanMax™
POWERING SUSTAINABILITY

Health and Safety Policy

CleanMax's vision is to be the sustainability partner of choice for private users. We believe that good Health and Safety performance is key to ensure sustainable business and is an integral part in our business decisions. According to us, all injuries, incidents and losses are preventable and we emphasize on the importance of our HSE code of conduct while dealing with stakeholders.

We encourage everyone to continuously improve standards of the Health and Safety to attain and exceed benchmarked standards.

CleanMax's Health and Safety Policy Aims -

- Safe and healthy working conditions for the prevention of work-related injury, ill health and wellbeing of all concerned parties /stakeholders.

- Developing knowledge and skill among employees, contractors/and vendors to demonstrate their responsibility in achieving safety practices.

- Continuously striving to identify, assess and manage our occupational hazards/risks through regular monitoring and management review along with consultation and participation of workers or representatives in the process.

- Continuously improve our Health and Safety performance by identifying opportunities, setting goals & objectives, maintaining standards, and providing adequate resources.

- Ensuring that Health & Safety measures are considered in the procurement of all our products and services, and the management of all our assets.

- Resolutely investigating health & safety incidents and communicating any lessons learned across CleanMax.

- Eliminating, minimizing or controlling the occupational health safety hazards and risks.

- Complying with required all statutory and other codes of practice requirements that concern Health and Safety.

- Undertaking regular audits and reviews to ensure that our health & safety management system is effective and that our projects are implementing all relevant requirements.

- Ensure communication of Health and Safety Policy and relevant standards to all stakeholders.
